LEAVE THE ORDINARY BEHIND

PURE METALLIC PEARLESCENT BASECOAT & EFFECTS COLORS:

This color chart is a guide designed to assist you in making your color selections for **PURE METALLIC** flooring. Printed colors and web colors show approximate color and will vary from printer and monitor screen. Your results will vary depending on the coating thickness, primer color, and ambient lighting.

These examples above have just the **PURE METALLIC** coating without any effects or techniques applied. It should be noted that the finished floor will develop it's own movement and settling within the first several hours after the **PURE METALLIC** coating and effects are applied. This develops naturally from the metallic compound in **PURE METALLIC**.

NOTE: WE CAN NOT GUARANTEE OR WARRANTY THE FINAL LOOK OF YOUR FLOOR AS RESULTS ARE UNPREDICTABLE AND BASED ON INDIVIDUAL ARTISTIC TECHNIQUE.
